Who  
We Are

# Introduction

Tungsten offers institutions a top-tier environment for the secure and compliant custody of their digital assets, backed by a team of industry experts committed to setting new standards in digital asset management.

More than providing safe storage, Tungsten is a dependable intermediary for institutions, handling their transactions precisely.

Each transfer we facilitate is carefully executed, minimising various risks – from security and regulatory concerns to geopolitical considerations.

Originating from the Further Ventures studio of ADQ and its \$200m fund, Tungsten was established to align with Abu Dhabi's 2030 strategic vision. Recognising a market demand, Tungsten is a local, fully-regulated institution offering top-tier virtual asset custody services.

# 01. Governance

Tungsten's Trust Office, with FSRA-approved procedures, ensures the precise execution of client requests while protecting clients from financial crime through our use of advanced monitoring tools.

Our asset management strategy involves a robust segregation of duties to reduce risks.

We have disaster-proof backups in multiple secure locations and maintain reserve capital, backed by our sovereign wealth owner, for financial stability.

# 02. Regulatory Compliance

The FSRA in ADGM is one of the most advanced regulators globally. It ensures comprehensive controls are in place by conducting annual on-site examinations.

Tungsten's people, processes, and technology have been thoroughly screened to ensure we are best placed to protect your assets.

## 03. Security

Tungsten's relentless commitment to security harnesses best-in-class, next-generation hardware security modules (HSMs) adhering to the industry's highest standards for multi-signature approvals.

Our custody wallets are securely offline, significantly minimising exposure to potential hacks.

Additionally, Tungsten implements rigorous physical access controls akin to bank-grade security protocols.

# 04. Insurance

Tungsten provides extensive insurance coverage for all customers, including a specie policy from Arch safeguarding vital backup materials like administrative devices and backups against physical damage, theft, and internal risks.

Additionally, clients can enhance their coverage by up to USD 1 Billion.

## Additional Services

Beyond core custody services, Tungsten offers a comprehensive suite of institutional partnerships and integrations that amplify its position in the virtual asset ecosystem. These integrations encompass various collaborations, including exchanges, liquidity providers, hedging and yield solutions, analytics providers, tokenisation platforms, and more.

By seamlessly connecting with these industry-leading players, Tungsten empowers its clients with unparalleled access to diverse services and functionalities from the safety of Tungsten custody.

Whether it's facilitating seamless trading on reputable exchanges, optimising liquidity provision strategies, mitigating risks through hedging tools, capitalising on yield-generating opportunities like staking, leveraging advanced analytics for informed decision-making, or harnessing the benefits of tokenisation, Tungsten's integrations ensure that institutional investors have a comprehensive toolkit at their disposal.
